

Unify Your Security with SaaS-Based Reveal(x) 360

As an ExtraHop Reveal(x) Enterprise customer, you've seen the value that complete visibility, real-time detection, and intelligent response brings to your organization. Now it's time to experience the benefits of unified on-prem, hybrid, and multicloud security from SaaS-based Reveal(x) 360.

Reveal(x) 360 deploys quickly and eliminates the need to maintain or operate physical or virtual appliance clusters. ExtraHop manages those for you and ensures that you always have a right-sized deployment.

With Reveal(x) 360, you can detect, investigate, and respond to threats from the data center to the cloud to the user and device edge in a single management pane.

A cloud-based record store with 90-day lookback and streamlined search capabilities enables faster investigation and response.

Reveal(x) 360 unifies cloud security across AWS, Azure, and Google Cloud environments. For AWS customers, Reveal(x) 360 offers frictionless deployment flexibility with broad visibility from VPC Flow Logs and access to packets for deep forensic investigation.
